U.S. Department of Justice
Cybercrime Response and Analysis Program

Reporting Period:	October 1, 2024 – September 30, 2025
Prepared by:	Cybercrime Response & Analysis Program
Publication Date:	January 2026
Document Type:	Annual Operational Report — Public Edition

This report summarizes operational performance, case processing statistics, and program initiatives related to cyber-enabled fraud and financial crime reporting assistance services. The report is intended for informational and transparency purposes only.

Conclusion	8

MESSAGE FROM THE DIRECTOR

During Fiscal Year 2025, the Cybercrime Response & Analysis Program continued to expand its operational capabilities in supporting victims of online fraud and financial crime. The program processed 75,841 cases across all reporting categories, representing a 14.1 percent increase compared with Fiscal Year 2024.

Operational improvements this year focused on automation of case triage processes, improved digital evidence intake procedures, enhanced data security controls, and expanded coordination with legal and investigative partners. These initiatives resulted in improved case handling efficiency and stronger program accountability.

Average case processing time was reduced to 3.8 business days, and the program maintained a compliance rate of 99.9 percent across all assessed governance controls. This report provides detailed information and statistical data concerning the program's activities during Fiscal Year 2025.

Director, Cybercrime Response & Analysis Program

January 2026

INTRODUCTION

This Annual Operational Report covers Fiscal Year 2025 (October 1, 2024, through September 30, 2025) and describes the activities and performance of the Cybercrime Response & Analysis Program. The program provides operational support for victims of online fraud and financial crime, coordinating case intake, triage, and referral across 94 U.S. Attorney's Districts.

This report provides operational statistics, financial data, compliance findings, and an outlook for Fiscal Year 2026. All statistics reflect final program data as of the close of the fiscal year.

SECTION I — EXECUTIVE SUMMARY

A. Overview

During Fiscal Year 2025, the program processed 75,841 cases across multiple fraud and cybercrime categories, representing a 14.1 percent increase compared with Fiscal Year 2024. Average processing time was reduced to 3.8 business days, and the operational compliance rate was maintained at 99.9 percent.

B. Key Operational Highlights

- 75,841 cases processed across multiple fraud and cybercrime categories
- Average processing time reduced to 3.8 business days
- Operational compliance rate maintained at 99.9 percent
- Significant growth in fraud-related reporting, particularly cryptocurrency-enabled scams

C. Program Improvements

- Automation of case triage processes
- Improved digital evidence intake procedures
- Enhanced data security controls
- Expanded coordination with legal and investigative partners

SECTION II — OPERATIONAL STATISTICS

A. Case Processing Metrics — Cases by Category

Case Category	FY 2024	FY 2025	Change
Criminal Fraud Reports	47,523	53,412	+12.4%
Civil Dispute Reports	12,487	13,908	+11.4%
Bankruptcy-Related Complaints	4,156	4,823	+16.1%
Fraud & Financial Crimes	2,317	3,698	+59.6%
Total	**66,483**	**75,841**	**+14.1%**

Table 1. Total cases processed increased from 66,483 in FY 2024 to 75,841 in FY 2025, a 14.1 percent increase.

B. Processing Time Analysis

Case Category	FY 2024	FY 2025	Change
Criminal Reports	3.8 days	3.4 days	-10.5%
Civil Reports	5.2 days	4.7 days	-9.6%
Bankruptcy Reports	4.1 days	3.7 days	-9.8%
Overall Average	**4.2 days**	**3.8 days**	**-9.5%**

Table 2. Overall average processing time improved to 3.8 business days in FY 2025.

SECTION III — GEOGRAPHIC DISTRIBUTION

Case submissions were received from multiple regions, reflecting continued growth in cyber-enabled fraud activity. Growth was highest in regions reporting cryptocurrency investment fraud and online impersonation scams.

Region	Cases (FY 2025)	% of Total
Northeast	20,478	27%
Midwest	17,694	23%
South	17,186	22%
West	20,483	27%
Total	**75,841**	**100%**

Table 3. Regional distribution of case submissions, FY 2025.

Regional distribution remained relatively balanced, with the Northeast and West each accounting for 27 percent of total submissions. The South and Midwest combined represented 45 percent of national case volume.

SECTION IV — FINANCIAL & OPERATIONAL RESOURCES

FY 2025 operational expenditures supported infrastructure, personnel, and cybersecurity systems required for case management and program delivery. Total approved budget for FY 2025 was $521.7 million.

Expenditure Category	Amount	% of Total
Personnel	$307.8 M	59.0%
Technology Infrastructure	$105.9 M	20.3%
Regional Operations	$72.0 M	13.8%
Compliance & Oversight	$36.0 M	6.9%
Total Approved Budget	**$521.7 M**	**100.0%**

Table 4. FY 2025 operational budget by category.

Investment Priorities

- Secure digital evidence storage
- Automated case triage systems
- Data protection controls
- Infrastructure scaling

SECTION V — COMPLIANCE & OVERSIGHT

The program maintained strict adherence to recognized cybersecurity and operational governance frameworks throughout Fiscal Year 2025. All internal audits conducted during FY 2025 reported no significant operational deficiencies. The program achieved a 99.9 percent compliance rate across all assessed governance controls.

Key Compliance Areas

- Information security controls
- Audit transparency
- Operational accountability
- Independent financial review

SECTION VI — STRATEGIC INITIATIVES

A. AI-Assisted Case Triage System

The program deployed automated case classification tools to improve routing accuracy and reduce manual processing time. The system achieved 97 percent classification accuracy, resulting in a 74 percent improvement in case routing speed and more equitable workload distribution across processing units.

Key Results

Metric	Result
Case Routing Speed Improvement	74 percent
Classification Accuracy	97 percent
Average Processing Time	3.8 business days

SECTION VII — FY 2026 OPERATIONAL OUTLOOK

Based on FY 2025 operational performance and projected trends in cyber-enabled fraud activity, the following priorities have been identified for Fiscal Year 2026.

A. Strategic Priorities

1. Expansion of automated fraud detection tools
2. Increased support for cryptocurrency-related fraud reporting
3. Improved inter-agency information sharing
4. Enhanced cybersecurity monitoring

B. Projected Case Volume

Program case volume is projected to reach 82,000 or more reports in Fiscal Year 2026, representing an estimated 8.1 percent increase over FY 2025 actual case volume of 75,841. Growth is driven primarily by rising cryptocurrency fraud and online impersonation activity.

Metric	FY 2025 Actual	FY 2026 Projected	Change
Total Cases	75,841	82,000+	+8.1%

CONCLUSION

Strategic investments in automation, data security, and inter-agency coordination have positioned the program to address the projected growth in case volume during Fiscal Year 2026 and beyond.

This report was prepared by the Cybercrime Response & Analysis Program and is published for informational and transparency purposes. All statistics reflect final FY 2025 program data as of January 2026.
